DSIO*1.0*2 (T30)

February 18, 2016

Poguirod	DSIO 1.0				
Required	DSIO*1.0*1				
KIDS Filename	DSIO_1_P2_T30.KID				
Associated Files	DSIO_TITLES.zip				
GUI(s)	DDCSFramework.bpl	V1.2.0.0			
	DDCSFormBuilder.dll	V1.2.0.0			
	DDCSDialogs.dll	V1.2.0.0			
	DDCSOBInitialBase.dll	V1.2.0.0			
	DDCSNursePostpartumMaternity.dll	V1.2.0.0			
	DDCSNursePostpartumDelivery.dll	V1.2.0.0			

Pre-Installation:

Extract DSIO_TITLES.zip to your database's default directory. If you don't know you can find the information in the KERNEL SYSTEM PARAMERTS file under record IEN 1 as the PRIMARY HFS DIRECTORY field. During installation you will be prompted with "Enter directory name or path" with it defaulted to your PRIMARY HFS DIRECTORY this is asking where are your TIU DOCUMENT TITLE XML DOCS

Installation:

Normal KIDS install through Kernel Installation & Distribution System

Post Installation:

* DDCSFramework.bpl is a Delphi package used for created new DDCS Forms. If you are not a developer and don't plan on creating new DDCS Forms then you don't need this package.

User Setup:

Assign the Menu Context DSIO DDCS CONTEXT to users needing access to the DDCS Form Templates (DDCS Forms).

Assign the Menu Context DSIO GUI CONTEXT to users needing access to the MCC Dashboard.

Assign the Menu Context DSIO MAIN to users needing access to the VistA side configuration options.

From the "Systems Manager Menu" option...

Assign the Security Key DSIO DDCS CONFIG to users needing access to the GUI side configuration form.

From the "Key Management" option...

Allocation of Security Keys De-allocation of Security Keys Enter/Edit of Security Keys All the Keys a User Needs Allocate/De-Allocate Exclusive Key(s) Change user's allocated keys to delegated keys Delegate keys Keys For a Given Menu Tree List users holding a certain key

List users holding a certain key Remove delegated keys

Show the keys of a particular user

Select Key Management <TEST ACCOUNT> Option: allocation of Security Keys

Allocate key: DSIO DDCS CONFIG

Another kev:

Holder of key: TF

1 TF FONTANA, THEO F TF

2 TFK BLDAALUFHXY, SHUHTL AAKLYN NEW YORK TFK 162-1 C

OMPUTER SPECIALIST

3 TFV VIPPROVIDER, THREE F TFV PHYSICIAN

CHOOSE 1-3: 1 FONTANA, THEO F TF

Another holder:

You've selected the following keys:

DSIO DDCS CONFIG

You've selected the following holders:

FONTANA, THEO F

You are allocating keys. Do you wish to proceed? YES//

 $\ensuremath{\mathsf{DSIO}}$ DDCS CONFIG being assigned to:

FONTANA, THEO F

Triggers:

Set the following parameters to "YES" if the site wishes to flag patients for tracking during dashboard use. What this means, do you want the program to check for patients that should be flagged when before completing a search action in the dashboard – this compensates for not being able to flag patients at real-time. The alternative is to set the options, name the same as these parameters, as scheduled tasks.

Create OE/RR ENTRY:

This file is accessed by CPRS to use COM. There are only two fields required to use DSIO DDCS and that's the NAME and OBJECT GUID fields. The GUID must look EXACTLY as seen below (with braces {}) but the name can be determined by the site.

INPUT TO WHAT FILE: OE/RR COM OBJECTS//

EDIT WHICH FIELD: ALL//

Select OE/RR COM OBJECTS NAME: DSIO DDCS FORM BUILDER

NAME: DSIO DDCS FORM BUILDER Replace

OBJECT GUID: {F4401FE9-4F5C-4633-B409-E7CEC0CE863F}

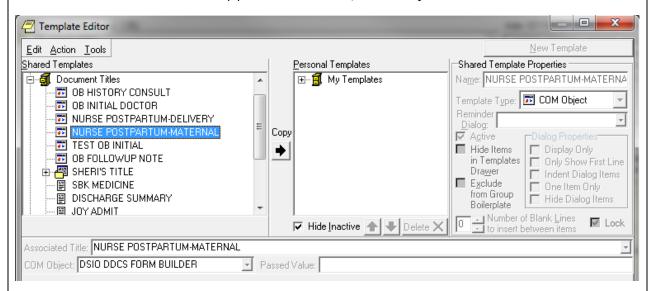

Replace INACTIVE:

PARAM1: DESCRIPTION: No existing text Edit? NO//

Link TIU Titles in CPRS:

The title must have be edited through the EDIT SHARED TEMPLATE option in CPRS with the title and COM entry.

In CPRS select a patient and navigate to the "Notes" tab and select the "Edit Templates" option under the "Options" menu. Select Document Titles and add a new template. This template must be a "Template Type" of "COM Object" with the "Associated Title" linked to the TIU Note Title you wish to have access this program with the "COM Object" field linked to the DSIO DDCS COM entry you created in the OE/RR COM Objects file.

For more information check out the documentation in the VA VDL. http://www.va.gov/vdl/application.asp?appid=61

Schedule the Task to PUSH Discreet Data:

You may schedule the option DSIO DDCS CHECK STATUS to meet your needs. This option will look for captured data in the DSIO DDCS DATA file and in there are new records that have not been PUSHed it will check the DSIO DDCS CONTROL file if the TRIGGER event is acceptable and if so it will PUSH the data based on the linked DSIO DDCS REPORT ITEMS.

In the "Taskman Management" option...

Schedule/Unschedule Options

One-time Option Queue

Taskman Management Utilities ...

List Tasks

Dequeue Tasks

Requeue Tasks

Delete Tasks

Print Options that are Scheduled to run

Cleanup Task List

Print Options Recommended for Queueing

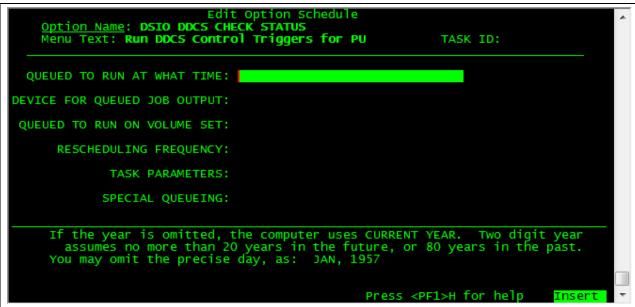

Select Taskman Management <TEST ACCOUNT> Option: SCHedule/Unschedule Options

Select OPTION to schedule or reschedule: DSIO DDCS CHECK STATUS Run DDCS C

ontrol Triggers for PUSH

Are you adding 'DSIO DDCS CHECK STATUS' as

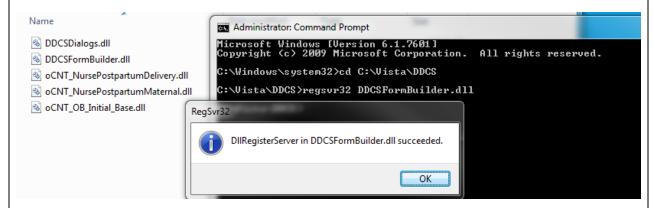

a new OPTION SCHEDULING (the 143RD)? No// Y (Yes)

^{*}Set the fields appropriate to your site.

Register the COM Object:

In Windows, open the command prompt as an administrator and navigate to the COM Object that is located on the workstation that is accessing the DDCS Form Templates/oCNTs. Once your terminal is pointing to the same directory in which your COM resides run the command "regsvr32 DDCSFormBuilder.dll" without quotes.

Setting the Location Parameter:

This parameter is required as it and the configuration file needs to be able to build the absolute path that will allow COM to access and open the form dll. In this case if I am accessing the TIU Note Title that is under DDCS control (NURSE POSTPARTUM – MATERNAL) then the oCNT_NursePostpartumMaternal.dll must then be located where the parameter indicates so: C:\Users\DSSDeveloper\Desktop\DDCS_output\ oCNT_NursePostpartumMaternal.dll

Set the LOCATION parameter to the location of the dlls.

Select PARAMETER DEFINITION NAME: DSIO DDCS LOCATION DSIO DDCS LOCATION

----- Setting DSIO DDCS LOCATION for System: SMA.FO-ALBANY.MED.VA.GOV ------ LOCATION: C:\Users\DSSDeveloper\Desktop\DDCS_output Replace

Optional:

If you wish to launch COM as an order check you can:

Select PARAMETER DEFINITION NAME: ORWCOM ORDER ACCEPTED COM Object on Order Acceptance

ORWCOM ORDER ACCEPTED may be set for the following:

User USR [choose from NEW PERSON]
 Service SRV [choose from SERVICE/SECTION]
 Division DIV [choose from INSTITUTION]
 System SYS [SMA.FO-ALBANY.MED.VA.GOV]

Enter selection: 6 System SMA.FO-ALBANY.MED.VA.GOV

---- Setting ORWCOM ORDER ACCEPTED for System: SMA.FO-ALBANY.MED.VA.GOV ----

Select Order Display Group: LAB LABORATORY

Order Display Group: LABORATORY// LABORATORY LABORATORY COM Object: DSIO DDCS FORM BUILDER// DSIO DDCS FORM BUILDER

Advanced Setup:

This patch transports configuration data so nothing below this line is required at the installation site.

Create CONTROL entries that allow you capture discreet data:

Create your control entries. You can use FileMan or the DSIO DDCS CONTROL option to assist you. You will need to know the object you wish to control and the expected destination of the data (the object that data is associated to).

For example, we need to CONTROL the TIU document title OB H&P INITIAL which is IEN 93 (in my database – you would have to check yours) in file 8925.1. So I need to CONTROL 93;TIU(8925.1, where 93 is the IEN and the right of the semi-colon is the global reference. I know that notes are stored in 8925 so I will use this file as my destination file and that entries in this file are directly associated to a patient because the patient pointer is field .02.

Select DSIO DDCS CONTROL CONTROL OBJECT: 93;TIU(8925.1, TEXT INTEGRATION UTILITIES

CONTROL OBJECT: 93;TIU(8925.1,//

INACTIVE:

DESTINATION FILE: TIU DOCUMENT//

PATIENT ORIENTED: YES// PATIENT FIELD: .02// SHARE: LIMITED//

FORM: OB HISTORY NOTE - NURSE//

PATIENT LOOKUP CODE:

TRIGGER LOGIC: I \$\$GET1^DIO(DDCSFLE,SIEN ",",.05)="COMPLETED"

Replace

PRE PUSH: N LNK S LNK=\$\$SPG^DSIO3(\$G(DFN),SIEN,\$\$PG^DSIO4(\$G(DFN)))

Replace POST PUSH:

PACKAGE: TEXT INTEGRATION UTILITIES//

Next we will create our FORM (interface) and link back to our control object we just created.

Now, we need to create our FORM which will inform the GUI how it should be configured. We will be using two files which exist as the newer 19641.42.

First we should create the new form configuration. We can add on overrides to every control within the dll. For the purposes of creating additional interfaces from a single dll you first need to create copies, name them appropriately, and create new entries in this file using those file names. You may then need to create a CONTROL NAME within the configuration of PAGE# where # is one through nine – you can hide the display of these pages by setting HIDE FROM NOTE equal to TRUE.

DSIO DDCS FORM CONFIGURATION (19641.42) will guide us through creating a form configuration entry.

DSIO DDCS PARAMETER (#19641.492) allows for additional form settings to be changed.

Description of Changes and Enhancements

Functionality Dashboard, VistA, and DDCS

29 02/12/2016 DSIO_1_P2_T29.KID

TA100843 MUMPS S31828: Place of Delivery Observation

• There isn't a Place of Delivery observation; however, the Nurse Postpartum Delivery oCNT was updated to set Place of Delivery

TA101030 Research RPC: DSIO GET PREG HISTORY RANGE S29924: DB: dashboard page - Followup - Deliveries/Outcomes - Testing [Continued from S31630, S31144, S30555, S30140]

• Research findings provided

TA100201 Dev - Rework S29108: oCNT: Shared Observations (oCNT/Dashboard) - Implementation - Part 2 (Remainder of the Observations not yet completed from Part 1) [Continued from S31635, S31146, S30553, S30136, S29640]

• The Birth Weight field no longer accepts decimals and the oCNT routines will not create the observations without the decimal values; however, the oCNT GUI has not been updated to not capture these places.

28 | 01/20/2016 | DSIO_1_P2_T28.KID

TA95579 Dev - Enhancement - Observation Configuration, API Create/Edit S29108: oCNT: Shared Observations (oCNT/Dashboard) - Implementation - Part 2 (Remainder of the Observations not yet completed from Part 1) [Continued from S30553, S30136, S29640]

27 | 01/15/2016 | DSIO_1_P2_T27.KID

TA96419 Dev - rework - Value format not clearly defined. Observations based on code generation not defined. S29108: oCNT: Shared Observations (oCNT/Dashboard) - Implementation - Part 2 (Remainder

of the Observations not yet completed from Part 1) [Continued from S30553, S30136, S29640]

- Added the DaysInHospital observation created by the Nurse Postpartum Delivery oCNT.
- Corrected the Pregnancy History Dialog complication type which is now classified as Outcome which the Pregnancy History file field 3.6 has changed to reflect this. The Nurse Postpartum Delivery Note has had a new dropdown box to capture these values.

26 01/14/2016 DSIO_1_P2_T26.KID

Corrections to the value string of the delivery type and outcome observations created by the oCNTs. Some additional changes to the Nurse Postpartum Delivery dialog to support.

Know Issues:

The pregnancy complication is not restoring for the Pregnancy History dialog.

25 | 01/13/2016 | DSIO 1 P2 T25.KID

Corrections to the value string of observations created by the oCNTs.

24 01/05/2016 DSIO 1 P2 T24.KID

TA92845 VistA - Dev S29108: oCNT: Shared Observations (oCNT/Dashboard) - Implementation - Part 2 (Remainder of the Observations not yet completed from Part 1) [Continued from S30136, S29640] TA89470 Dev - Rework DE10037: Assigning an EDD using Est. Conception, Ultrasound, Embryo Transfer and "Enter other criteria" change the pregnancy status to Not Pregnant - Seen in demo [Continued from DE10400, DE10141]

Please note that in order to accomplish the above routines were rewritten and functionality added, the Nurse Postpartum form was rebuilt, the Pregnancy History dialog was enhanced, and there were some VistA DD modifications as well as DDCS data configuration changes.

20 | 11/05/2015 | DSIO_1_P2_T20.KID

TA86138 GUI - Delphi/MUMPs S28154: oCNT: history, social, lifestyle updates (waiting on user clarification to assign)

- Added "Current Occupation"

19 | 11/04/2015 | DSIO 1 P2 T19.KID

TA86138 GUI - Delphi/MUMPs S28154: oCNT: history, social, lifestyle updates (waiting on user clarification to assign)

TA85138 oCNT - Research - Memory Manager S27912: Research - oCNT Memory Manager - Delphi 2006 Compatibility [Continued S28069]

TA86155 GUI/MUMPs S28153: oCNT: Family History modifications (waiting for user clarification to assign)

TA86174 GUI/MUMPs S28152: oCNT: Surgical History updates (waiting on confirmation from users before assigning).

18 10/23/2015 DSIO 1 P2 T18.KID

TA84555 Dev - Rework S27538: VistA: Main Menu Option OPTION: DSIO DELETE PREGNANCY

- The second question to confirm the desire to delete was overwriting the Y variable which stored the IEN of the pregnancy to be deleted. The IEN is now being saved off so that the confirmation can be asked without losing the IEN.

17 | 10/20/2015 | DSIO 1 P2 P17.KID

RPC: DSIO SAVE PREG DETAILS

- Request to allow the deletion of High Risk Pregnancy details/comments to be deleted when the information is not present
- Updated COMMENTS and HRD to behave the same

TA81129 Mumps - build framework S26936: oCNT framework to use Observation framework [Continued from S27346]

- Updated to create observations when the interface is PUSHed as a whole

16 | 10/20/2015 | DSIO 1 P2 P16.KID

The process of getting a patient's high risk details when there was not was causing errors which was correcting by wrapping the note in dollar get.

TA81129 Mumps - build framework S26936: oCNT framework to use Observation framework [Continued from S27346]

- When an oCNT is PUSHed it will create observations if it is set as a push by individual controls rather than by the whole interface. The interface will get the same treatment as it is in progress.

15 | 10/16/2015 | DSIO_1_P2_T15.KID

TA83754 GUI DE9749: Full Term/Premature counts need to switch Preterm Delivery Radio Group values TA83749 GUI DE9748: Cancel "Delete" should not change anything for "Total Pregnancies" – 1 *REPORTED (NO DEFECT # ASSIGNED) – Pregnancy History Dialog type number of page to delete, selecting a page that doesn't exist causes an error.

Applied fix

TA80363 Dev rework S26015: oCNT: Pregnancy History Dialog [Continued from S26785, S26334]

• Fixed the note creation

TA80595 Dev - Rework S26004: V: Save Vitals [Continued from S26783, S26336]

- EDD Observations are only PUSHed if "Is Final"
- The Value for EDD observations is EDD_DATE|(TRUE,FALSE(YES,NO)(1,0))
- EDD by LMP will update LMP (EDD 280)
- EDD by ECD will update the pregnancy start (EDD 266)

TA80401 Dev - rework S26026: V: Add PUSH Configuration [Continued from S26787, S26330]

- EDD by LMP removed and now will be an observation for LMP to update LMP
 - \circ $\,$ When used by the oCNTs it will be generated by the EDD calculation by LMP and only update if "ISFINAL"
 - o The observation itself will update EDD and LMP each time due to creation

Configuration

Changed Caption names for OB History and OB Consult

8 | 09/25/2015 | DSIO 1 P2 T8.KID

- 1. Update configuration of oCNTs
 - a. OB History Note Nurse 1st Half of oCNT
 - b. OB Consult Doctor 2nd Full oCNT Restore from Nurse
 - c. OB Follow Up Whomever _ 3rd Full oCNT Restore from Doctor of Follow Up whichever came last
- 2. Alert for tracked patients only (S22549)

7 09/21/2015 DSIO_1_P2_T7.KID

- 1. Delete Historical Pregnancy (S17505)
- 2. Pregnancy History Dialog (S26015)
- 3. PUSH and Configuration Pregnancy History (S26026)
- 4. Observation PUSH Entries (S26654)
 - a. Lactation Status
 - b. Last Contact Date
 - c. Next CheckList Date
 - d. Next Contact Date
 - e. Patient GP
- 5. Family History Dialog (S26492)
- 6. PUSH and Configuration Family History (S26026)
- 7. Summary for Overview Page (\$26493)
- 8. Added dashboard Note Titles to 19641.4 (Discreet Data Control)

6 09/04/2015 DSIO 1 P2 T6.KID

- Pregnancy History Dialog (\$26015)
- Flow Sheet (Dialog) (S26025)
- Pelvic Exam (Dialog) (S22776)
- Infection History Dialog (S26093)
- Save, PUSH, Restore Vitals (S26004)
- Continued Form and Dialog additions/improvements

PENDING

- 1. Family History needs to function like Pregnancy History and Nurse Postpartum Delivery
- 2. Form Summary
- 3. Integrate Observations into DDCS
- 4. Update Observation PUSH entries (LACTATION STATUS, LAST CONTACT DATE, NEXT CHECKLIST DATE, NEXT CONTACT DATE, PATIENT GP)
- 5. 508 (DDCS)
- 6. Add "Other" to Education Update
- 7. Alerts for Tracked Patients only

5 | 08/26/2015 | DSIO 1 P2 T5.KID

Changes

- 1. Moved trigger logic execution to allow expected variables to be set
- 2. Corrected the RPC to collect data for the DDCS Form
- 3. Configuration updated for Dialogs
 - a. VISUAL CHANGES
 - b. Flow Sheet (this does not mean that it's done *see pending)
 - c. *Pregnancy History (not done *see pending) "place of delivery" has not been defined (this is very site specific which is why the drop down can be typed in)

Pending

- Pelvic exam rebuild must be defined
- Summary box on the first page needs to be defined must be defined
- Vitals has to be staged the process has been conceptionalized
 - A vitals multiple will be applied to the 19641.4941 (shared data) file which will reside under the patient with a .01 (as a multiple) as a pointer back to the 19641.41 (data)

record. It will take a couple of hours to build the location, RPC, and make the GUI modification

- Pregnancy History Restore and Configuration
- OB Flowsheet Restore and Configuration information
 - Allow multiple entries for the flowsheet per day (date and time)
- PUSH routines have to be reapplied to their new controls through file configuration

Enhancement

 Integrate DSIO OBSERVATION with DDCS to allow controls to have observations configured and when PUSHED to create an observation

4 08/22/2015 DSIO_1_P2_P4.KID

Changes

- 1. Nurse Postpartum Height increased slightly
- 2. Infection History Narrative Label is now made visible after "No history of infection" is checked
- 3. Merged 19641.42 with 19641.48 to improve configuration
- 4. There is no longer a need to copy and rename the OB_Initial_Base.dll the new configuration file (#19641.42) includes a FILENAME field
- 5. When the TRadioGroup control type is saved it no longer includes the caption this was inconsistent with how other controls are saved
- 6. The Combobox dropdown has had the widen function reapplied
- 7. Added "??" lookup to DSIO DDCS CONTROL option and in all cases
- 8. Updated the DSIO DDCS FORM CONFIGURATION option in all cases were the 19641.42 file was updated
- 9. Restored Run Routine back to the configuration routine (RPC) that now handles configuration for the GUI and restore for both forms and dialogs
- 10. Added PageControl to Note Generation, Configuration, and Save it isn't treated like other controls but instead it, TGroupBox, and the TPanel have their nested controls exposed to the listed functions
- 11. When a page tab is hidden (unless there is only one page on the form) then the page's controls will not be added to the note or saved)
- 12. Review page button changed from "ACCEPT NOTE" to "ACCEPT"
- 13. Review page parameter added to make the note read only
- 14. Vitals Menstrual History contraception items have been added- Vitals has its own RPC for the LMP tab to populate the form with the users current data this form is not intended to restore the data displayed is the current data for the patient. The configuration file (#19641.41) can have any page set as it's Vitals page, when done so it will allow the editing of the contraception list. *The functionality to turn on/off Vitals or change the page has not been implemented.
- 15. The GUI collection fields that can be applied to all controls have been added to the configuration file
- 16. The GUI side configuration (this option is visible to users holding the DSIO DDCS CONFIG key and accessible via the button on the bottom left corner of the application above the ABOUT option) has been updated to assist with updating the configuration. The options to import the FORM controls and import the DIALOGS have been updated
- 17. Added the insertion of predefined text to the Physical Exam dialog when normal is clicked but left out the entry for Pelvic Exam as the entry has been removed (there is dialog dedicated to Pelvic Exam). The entry for "Back" was added. When "Abnormal" is clicked and the inserted text has not changed from the default then it is cleared. The entry for "Skin" was applied to "Integumentary". HEENT not added it was broken down to support the IHE documents.

Configuration

Form Configuration of Pages

• To hide a page entries in 19641.48 have to be created as PAGE# (for the nurse interface an entry of PAGE7, PAGE8, and PAGE9) were created with a value of HIDE FROM NOTE set to yes

Data Shuffle

- * Passing data forward is done by a shared data location with DFN being the master record so to preserve this data it will also be saved normally
- All three OB forms are set to SHARE = LIMITED for their CONTROL records
- All three OB forms are set to SHARE = YES for their FORM records
- Only the Flow Sheet Dialog is set as SHARED = YES
- At this point all data can be passed forward; however, the OB Nurse Note needs to start anew so
 it has an ACTION in the FORM file set to A meaning DO NOT RESTORE
- New field RESTORE AS and is used as:
 - a. OB HISTORY NOTE NURSE = null
 - i. As set as ACTION type A to "DO NOT RESTORE" to reset the shuffle
- OB H&P CONSULT DOCTOR = OB HISTORY NOTE NURSE
 - a. So the doctor starts with the nurse note and builds up the doctor note
- OB FOLLOWUP NOTE = OB H&P CONSULT DOCTOR
 - a. So the followup note starts with the doctor note and builds up the followup
 - b. If there is no doctor note then the followup build upon itself
 - c. Therefore, if the followup is done without the nurse it will restore with whatever was placed in there last. Not until the doctor note is created with the followup reset with new data.

Pending

- Pelvic exam rebuild must be defined
- Summary box on the first page needs to be defined must be defined
- Allow multiple entries for the flowsheet per day (date and time)
- Vitals has to be staged the process has been conceptionalized
 - A vitals multiple will be applied to the 19641.4941 (shared data) file which will reside
 under the patient with a .01 (as a multiple) as a pointer back to the 19641.41 (data)
 record. It will take a couple of hours to build the location, RPC, and make the GUI
 modification

Known Issues

- Pregnancy History Restore and Configuration
- OB Flowsheet Restore and Configuration information
- PUSH routines have to be reapplied to their new controls through file configuration

3 | 08/17/2015 | DSIO 1 P2 T3.KID

Changes

- COM rebuilt restored back to dll **new GUID**
- Changed ACTION file to a set of codes type free text field for the configuration and dialog files (19641.42 and 19641.49)
- Added the DSIO DDCS PARAMETER file (19641.492) to work alongside the DSIO DDCS CONFIGURATION parameter. The parameter will continue to handle system level configuration such as LOCATION while the file will handle interface level parameters.
- Increased the page limit from 20 to 30
- Runtime forms now benefit from prebuilt configuration (19641.48)
- Hold on Show, Show Splash, Preview Title, and Dialogs Required are now parameters
- Hide single page tab
- Corrected multivalued controls (save/restore): TListView, TListBox, TCheckListBox, TComboBox,

TMemo, TRichEdit

- Data sharing between Dialogs (Initial Nurse to Initial Doctor to Followup)
- Restored the RPC: DSIO DDCS IMPORT FORM (Formerly DSIO OCNT IMPORT) to complete configuration on the VistA end. This RPC is used by the GUI side configuration.

Configuration

- Dialog configuration
 - To hide a page entries in 19641.48 have to be created as PAGE# (for the nurse interface an entry of PAGE7, PAGE8, and PAGE9) were created with a value of HIDE FROM NOTE set to yes

Pending

- Pelvic exam rebuild must be defined
- Add insertion of predefined text when normal is selected for ROS dialog
- Allow multiple entries for the flowsheet per day (date and time)
- Summary box on the first page needs to be defined must be defined

Review

- PUSH M code
- Family Assessment Names configuration

Known Issues

- Combobox dropdown needs to be widened for the longest item
- Nurse Postpartum Height
- Vitals Menstrual History contraception items
- Pregnancy History Subforms configuration
- Pregnancy History Restore
- Infection History Narrative Label is not made visible after "No history of infection" is checked
- OB Flowsheet configuration information
- OB Flowsheet Restore

2 08/06/2015 DSIO 1 P2 T2.KID

Changes

- 1. Tab button is now hidden when only a single page
- 2. Vitals Final GA added and added to note
- 3. Clear Final GA and Final EDD when the checked check box is unchecked
- 4. When row data is updated while checked uncheck and clear Final GA and Final EDD
- 5. The "Final EDD" checkbox now updates to check when clicking from one check to the next
- 6. Vitals Embryo Transfer Day needs to be restored
- 7. Vitals tab format for Vitals and Menstrual History could be better (low priority)
- 8. RESTORE (for dialogs tested)
- 9. RECORD PUSH transactions are recorded
- 10. PUSH by controls has been added
- 11. Auto Installation Configuration
- 12. General Housekeeping (VistA)
- 13. RPC: DSIO DDCS GET CONTROL VALUE Upgraded to handle an OBJECT entry of N=### for note equals IEN and O=### order equals IEN. The Dashboard can call this RPC with ("N=###","OTHER",###)

Future/ToDo

Some of the redesign allows for better reuse of the interfaces and to pass information between then.

14. OB Initial (Nurse), OB Initial (Doctor), OB Follow-Up will pass information between each other

- using the RESTORE functionality.
- 15. Note validation controls can be set to required (in VistA) which should prevent a note from being finished if the value is null. I need to test and confirm this still works.
- 16. Pelvic Exam Rebuild

1 07/23/2015 DSIO DDCS 2 T1.KID

** The format of the SAVE array has changed**

It is now: CONTROL^(INDEXED^VALUE)

INDEXED isn't always required for all controls and in the case it is not used there shall be an empty piece. When it is used it can be used however the calling program sees fit so if it needs to store a number than a number can be used but for controls that are a list of Boolean then it may be helpful to store true/false as the INDEXED value.

Changes

- 1. See configuration below
- 2. Split Nurse Postpartum into Nurse Postartum-Maternity and Nurse Postpartum-Delivery (if you don't like the names see #1 above)
- 3. Spelling corrections and other minor corrections reported by Mollie
- 4. "Negative for All" is in the same location throughout dialogs
- 5. "Negative for All" became "Normal for All" where appropriate
- 6. Vitals can now be tabbed within.
- 7. Vitals EDD and LMP tabs written out to "Estimated Delivery Date" and "Menstrual History"
- 8. Pelvic Exam removed from Physical Exam dialog
- 9. OB Exam dialog renamed to Pelvic Exam
- 10. Removed Fibrosis from Pelvic Exam
- 11. Active Problems import removed from OB History base
- 12. OB Flow Sheet Fetal Activity now is "No" and "Decreased" this is configured in VistA (19641.48)
- 13. OB Flow Sheet Cervical Exam is no longer required
- 14. OB Exam (now Pelvic Exam) now reads Clinical Pelvimetry where it was Pelvis
- 15. OB Exam (now Pelvic Exam) now has dimensions of "Adequate", "Borderline", and "Inadequate"
- 16. Nurse Postpartum-Delivery now has AKRI under Vaginal
- 17. Nurse Postpartum-Delivery now has "Days to Delivery At"
- 18. Nurse Postpartum-Delivery now has "Bakri Balloon Placement" as a checkbox in Other Procedures
- 19. Rebuilt CONTROL
- 20. Rebuilt SAVE this will break the dashboard!
- 21. Tabs will now check with use of the Next and Previous buttons on entry
- 22. Physical Exam dialog is now two pages with more entries and renames based on Randy's request
- 23. Infection dialog now includes Narrative
- 24. Infection dialog now includes "Not Known"
- 25. Medical dialog now includes Narrative
- 26. OB Flow Sheet now has a single OK button that will add the current information to as a row, close the form, and populate the memo. A "Add Row" button has been added in Edit Mode to allow for the adding of multiple rows during a single session.
- 27. The plan tab for the OB Initial base will now add problems on check
- 28. New options for assisting in editing the configuration files and others to display data from 19641.41, 19641.4941, and 19641.45

Disabled

The following functionality won't be enabled in current patch.

- 1. PUSH the functionality to PUSH individual controls on trigger is incomplete; however PUSHing a complete interface is now included. Some oCNTs will benefit from this.
- 2. RESTORE the functionality to RESTORE is incomplete. This functionality is not benefit Maternity

Tracker for a complete interface because CPRS does not send enough information to be able to recall the information; however, it does use this functionality when re-displaying a dialog during the current session. This functionality is being built into the initial call for configuration to have on less VistA call and save GUI processing time.

3. RECORD – PUSH transactions are recorded, this routine will have to be reviewed once PUSH is completed.

Future/ToDo

Some of the redesign allows for better reuse of the interfaces and to pass information between then.

- 1. OB Initial (Nurse), OB Initial (Doctor), OB Follow-Up will pass information between each other using the RESTORE functionality.
- 2. Note validation controls can be set to required (in VistA) which should prevent a note from being finished if the value is null. I need to test and confirm this still works.
- 3. Vitals tab format for Vitals and Menstrual History could be better (low priority)
- 4. Vitals Final GA is incomplete
- 5. Vitals Embryo Transfer Day needs to be restored
- 6. Pelvic Exam is a mess
